General Maintenance

- Make sure all nuts and bolts are secure before each use.
- Replace any worn or damaged parts with components from Lone Wolf.
- All bolts for this product are Grade 8.

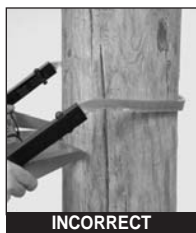

POLYURETHANE TRACTION BELT

APPLICABLE TO: Alpha™ Sit & Climb and Alpha™ Hand Climber

- 1.) With a permanent marker write date of 1st use on each belt.
- 2.) Inspect belt before each use
- 3.) Replace every 5 years or when you observe any of the following:
 - a.) belt has external cracks or tears visible
 - b.) any internal cables are broken
 - c.) any teeth are offset from normal pitch or are torn or cut

(dia. 1)

(dia. 2)

(dia. 1a)

(dia. 2a)

Shown is the proper use of the traction belt for the Lone Wolf Climbers (dia 1). The polyurethane belts are designed to be used on the Lone Wolf products only. Always use your traction in the position that it is shown in dia 1. Never use the belt in this position (dia. 2). Use in this position can cause damage to the traction belt. **WARNING:** Point of arrow marks the end of the belt (dia. 2a). No part of the arrow should be showing after the cams are engaged (dia. 1a). Any failure to follow the instructions may cause belt to disengage and cam to open.

POLYESTER WEB BELTS

APPLICABLE TO: Alpha™ Ladder Stand, Climbing Sticks, Elite™ Hang on, Alpha™ Hang On, Assault™ Hang On, and Assassin™ Platform, Pro Series Hang On & Climbing Sticks

- 1.) Inspect belts before each use
- 2.) Replace every 5 years or every year if left out yearly
- 3.) Replace belts if you observe any of the following:
 - a.) cut or worn webbing
 - b.) buckles are bent or cam release is binding
 - c.) stitching is loose, cut, or becoming unraveled
- 4.) With a permanent marker write the date of the 1st use on each belt

Lone Wolf Camera Arm

WARNING!

Failure to follow these instructions could result in serious injury, death or damage to camera equipment.

- **Do not** use camera arm to assist you in entering or exiting you stand.
- **Do not** lean on or against camera arm.
- **Do not** use arm to support your weight.

Using in above fashion could cause arm to become disengaged from tree, resulting in loss of balance or falling out of tree.

- **NOTE:** Arm is designed for cameras UP TO 6 lbs.

Step 1: Place the camera arm against the tree at your desired height. Wrap the belt around the tree placing the loop over the versa button and pulling tightly.

Step 2: Turn the knob in to tighten the bolt. This will level the arm.

ALWAYS WEAR A TMA APPROVED FALL ARREST SYSTEM WHEN USING ANY TREESTAND
